GENERAL INFORMATION

Ordering Information: Please make sure you are ordering the correct parts. Verify page numbers and part numbers upon ordering. On larger orders please fax (905) 404-2302, email at bill@billstruckshop.com / rob@billstruckshop.com / aaron@billstruckshop.com or call for more information.

Payment: We accept VISA, MasterCard, Money Orders, E-Transfers, Personal and Company cheques. Payment plans also available on large restoration. Applicable taxes apply to all sales.

Shipping: Ship by your choice of Canpar, UPS, FedEx, Canada Post, or truck carrier on some large items. Most orders can be shipped same day for next business day delivery. Actual shipping charges will be applied. Also a \$10.00 COD surcharge applies.

Pricing: Prices are in Canadian currency. Due to constant fluctuation between the Canadian and U.S. dollar –refer to the prices in the catalogues as a **GUIDE ONLY!** Bill's Truck Shop Limited Ltd., reserves the right to make appropriate changes as necessary. We try to keep prices low by keeping a large inventory on hand at all times. WE never buy parts with YOUR money to sell to YOU so we never pre-charge you for normal stocking items that are out of stock.

Returns and Guarantees: If fault is found in the parts or workmanship of item purchased, full money back guarantee or exchange for new item. If fault occurs from installation or misuse, no return will be given. No refunds will be given on electrical components or literature. Call with any questions.

Back Orders: No shipping charges will be applied to regular stocked items, unless a manufacturer's back order applies. All back orders cancelled after 60 days.

Discounts: Business's may apply for discounts after providing valid business info. Regular customer discounts can be applied depending on volume purchases / monthly specials and payment type. (E.g.: 3% discount on cash sales - on applicable items only) Check our website for monthly specials.

Parts: There is an ever increasing supply of reproduction parts; they are not always listed in the catalogues. New items can be viewed on our website, www.billstruckshop.com or call for info.

Used Parts: Unlike many other parts suppliers we stock or locate many parts that are not reproduced. We import parts from (California) and bring back trucks, beds, cabs etc. Bill's Truck Shop Limited has made a commitment to supply many new and used parts for your restoration and as a result we are the largest truck part supplier in Canada. NO discounts on used parts. We also will take your used parts in on trade.

Hours of Operation:

Monday to Friday 8:00am to 5:00pm EST

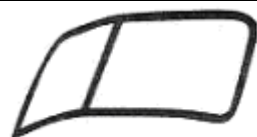

Saturday 8:00am to 1:00pm – Confirm by appointment

Sunday and holidays –Closed

NOTE: IF DRIVING LONG DISTANCE TO VIEW OUR INVENTORY, PLEASE CALL AHEAD

CONFIRM BACKGROUND & NEEDLE COLOUR

There have been some issues w/ the repro gauges as they have the pin style sweep needle instead of the inner sweep needle (see picture) and making contact w/ the upper gauge inner bezel-this requires removing some of this bezel for the needle to clear

The easy latch kit is a vehicle specific bolt-on, bear jaw rotary claw latch kit. This kit features contoured jam plates to match the features of your vehicles doors. These are in no way a universal application. The bear jaw rotary claw latches are each designed to work with the exterior handles, interior handles, and the exterior door lock cylinders of the specified vehicles. Each piece of the bear jaw latches are zinc plated to fight corrosion. The internal claws are case hardened and black oxide coated. Each kit comes with everything you need for two doors. Latch plates, vehicle specific bear jaw rotary claw latches, templates, hardware, detailed instructions, striker plates, and even stainless steel striker bolts. The Easy Latch kit will have your doors opening and closing smoothly and safely. All of the kits are designed, manufactured, and assembled here in the US. Most of our Altman Easy Latch Kits jam plates are available in your choice of paint to match steel or mirror polished stainless steel.

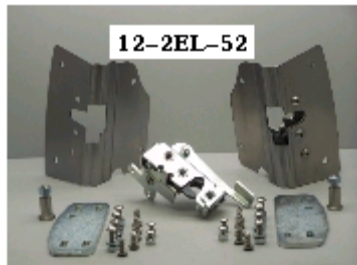

47-51 doors do not have a OE lock on the drivers side-the Altman latch allows you to lock w/ inner door handle- a new lock must be installed on the left door if you want it to lock like the pass side-----handles NOT included

Easy Latch kit

STEPSIDE TAILGATE EDGE PROTECTOR

Screw & or urethane to gate

22-0STP-B black satin stainless steel 54-87 \$79.95

22-0STP brushed stainless steel 54-87 \$79.95

Step side Stealth Tailgate Latches (pair)

These latches are great for people who are trying to eliminate the tailgate chains front their step side truck. These hidden latches use a slotted tubular channel to guide a spring loaded locking pin. They can be mounted inside the tailgate where they are completely out of sight. Only a small actuating knob is visible.

22-0SLK-S stainless steel 47-87 \$89.95

22-0SLK-Z zinc coated pair 47-87 \$89.95

Bed Roll Light kit-fit 40-66 bed rolls and 40-87 Mar-k made bed side roll

31-0864 dual intensity LED lights w/ hdw & instructions 50-66 \$229.95

47-53 \$449.95

Volt Booster-will operate 12 volt negative ground

accessories from 6 or 8 volt negative ground electrical systems. The maximum output power is a function of input voltage. When used in a 6 volt system, it can continuously supply more than 3-1/2 amps with the engine off, and about 5 amps with the engine running at a fast idle. Because of its very efficient design, its current draw is negligible when no load is applied (10 milliamps).

NOT RECOMMENDED FOR: Power actuated door locks, trunk release solenoids, air conditioner clutches, fans, blowers, power windows, or other electromechanical devices.

Group 39

Alignment Solution for Installing a Late Model Rear End in a 1947-1954 Pick Up
On the original rear end, the spring centerbolt is offset to the front of the spring by 2" to 3". If you install a modern rear end (with an open driveshaft) and retain the original springs, the wheels will end up offset forward (inside) of the original wheel openings in the fenders. To correct this problem, remove the original springs and reverse them end to end (front to back) as they are the same on both ends. This will bring the spring centerbolt to the rear of the axle and place the new rear end in the center of the fender wheel openings.

Want to lower your truck

-remove leafs to 7 on front and 7-8 on rear and use the(1") shorter ft shackles on rear -an inexpensive way to lower the overall height of the truck by 2 to 3 "

Main Leaf Spring-replace the main leaf only if bushing eyelets are broken or worn OR if leaf is broken- bushing not included

39-210M-F	front	1/2 ton only	each	47-55	\$139.95
39-210M-R	rear	1/2 ton only	each	47-55	\$139.95

Main Leaf Assist Spring

39-210A-F	2 nd leaf w/ curl at spring eye @ shackle	47-55	\$95.00
-----------	--	-------	---------

Leaf Spring

39-210-F	set of good used 1/2 ton front-per side	47-55	Inquire	\$100.00
39-210-R	set of good used 1/2 ton rear-per side	47-55	Inquire	\$100.00

. For rear leaf spring setups, these items help correct your rear end to **driveshaft angle** and eliminate vibration during operation at all speeds. Misalignment is common on lowered and lifted vehicles Our axle shims are also an important item when you have added power steering to your vintage straight axle front end.

Original straight axle front ends came with minimal caster angle to make steering easier on the driver. When power steering is added, the **caster angle** must be increased or "road wander" becomes prevalent.

Pinon & Caster Angle Shim set

39-0004-FR	2 " wide 4 deg w/ bolt-ft caster or rear pinion angle	47-59	\$52.95
39-2004	original caster shims 1 3/4 wide pair	47-55	\$10.00

Leaf Spring Center Bolt w/nut ----- confirm size

39-0211-3/8	3/8 x 7 "	each	47-72	\$5.95

Muncie-1940-63 Cars, 1940-68 Light Duty Trucks:

Cast iron case and extension housing with 4-bolt side cover. Has non-synchro 1st and a "barrel" type 2/3 assembly. Units from 1940-54 have enclosed driveline, otherwise known as a "torque tube". Those from 1955-68 may have electric overdrive. Some of 1964-65 units have larger gears with the same tooth count as the 1940-68 units.

The SM-420 4-speed transmission was produced by General Motors between the years of 1947 & 1967. Starting in 1966 General Motors offered the NP-435GA for its light truck applications as an option. The NP-435-GA became the standard 4-speed sometime in the late 1960s. The cast iron case with large bulge on the passenger side makes the SM-420 easy to identify. Ribbing was added to the bulge on later cases, The ribbed SM-420 case should not be confused with the later SM-465 transmission. How can you tell which 4-speed your 1966 has, if reverse is to the driver & down, it's the SM-420, if to the passenger & down

Relay-electric fan control

44-0016-R This adjustable electric fan switch with thermostat allows you to run your electric fan-installs temp probe in rad fins

Year	New
universal	\$42.95

44-0016-S

This Electric Fan Relay with Thermostat kit allows you to run your electric cooling fan in a much more efficient manner. It powers up your electric fan when your motor reaches -185 degrees F and powers down when your motor reaches 170 degrees F! w/ temp sender

universal	\$74.95
-----------	---------

44-0016-SD

Dual fan relay Kit, 80 Amps, 12V, temp sender, two 40 Amp relays, On at 195 degrees, Off 180 degrees, Harness, Kit

universal	\$114.95
-----------	----------

Electric Fan

44-0016 Produces a TRUE 2300 CFM Rating at 18.4 or 14 amp draw.

- This fan is 3 1/4" deep through the center of the motor; it gradually thins to 1 1/2" at the outer edge.
- Curved blades are quiet and push the same amount of air as a straight blade.
- Factory built as a puller, mounted inside and pulls the air through the radiator.
- 12V REVERSIBLE 'S' BLADE - Blades & polarity of the wiring can be reversed & it becomes a pusher

universal	\$99.95
-----------	---------

44-0014 13.82 " wide//2 58 " deep 1750 CFM 12 V 90 W reversible

universal	\$99.95
-----------	---------

44-0012 12 " wide 87 0 CFM 12 V reversible

universal	\$89.95
-----------	---------

Install Kit-electric fan

44-0910 \$18.95

Fan Shroud

41-2FS plastic-cut for fan opening 47-55 \$69.95

Fan Shroud

41-2FS-1 aluminum shroud -accepts 1 single 16"electric fan 20 3/4" H x 19 1/4 W secures to rad

47-55	\$114.95
-------	----------

Universal-----upper fan guard

41-0FS-3 polished stainless steel 3" deep x 20 dia universal \$42.00

41-0FS-5 polished stainless steel 5" deep x 20 dia universal \$42.00

BRAKES

Group 41

Proportioning Valves

17-0PVKS-2 \$149.95
Brake Proportioning Valve -disc/drum w/ lines-when
converting to disc front **Brass**

17-0PVKS-4 \$149.95
Brake Proportioning Valve -disc/disc w/ lines-when
converting to disc front and rear **Brass**

17-0PVKS-A4
Brake proportioning valve-disc-disc & disc drum
w/ lines & bucket **Aluminum** \$159.95

17-0PVK-H
Replacement harness w/ socket \$19.95

Disc Brake kit

47-59-5 **lug disc brake kit**—uses stock ½ spindles & hubs
Kit includes rotors, 5x 4 ¾ bolt pattern--- calipers,
brackets, flex hoses and hardware Bearing upgrade(tapered
roller w/ seals) may not work with stock wheels-1947-49
may require re-drilling lower spindle holes from 7/16 to ½ “
45-0WBK-5 47-59 \$659.95

47-59 **6 lug disc brake kit**—uses stock ½ spindles &
hubs. Kit-includes rotors, callipers, brackets, flex hoses
and hardware Bearing upgrade(tapered roller w/ seals) is
recommended-may not work with stock wheels-47-49 may
require re-drilling lower spindles holes from 7/16 to ½ “
45-0WBK-6 47-59 \$763.35

Wheel Bearings kit-upgrades to tapered roller

bearings w/ grease seals ½ ton only
38-04759-BK 47-59 \$189.95
38-04759-S replacement grease seal each 47-59 \$12.95

47-59 Disc brake upgrade bkt kit 47-59 \$174.95
45-0DBK-5

5 x 4 ¾ bolt pattern-add callipers, 11”, rotors w/ bearing upgrade
kit, brackets, flex hoses and hardware-bolts to stock spindles.
Converts your straight axle to disc brakes-used factory holes on ½
ton spindle-kit includes calliper brackets, bearing adaptors &
hdw-used 70-77 Camaro rotors & callipers--will also have to
upgrade to dual master & prop valve

17-0BR13	Inner wheel bearing	each	\$16.95
17-0BR49	Outer wheel bearing	each	\$12.95
17-0BR2	Outer wheel bearing	each	\$12.95
17-0984	grease seal	each	\$5.95

Ever had problems with a spongy pedal or slow, unresponsive brakes? If so, you may need a residual pressure valve installed in your brake line. A residual valve acts like a one-way or check valve to maintain brake system pressure to eliminate the problems of a spongy pedal. This 2 PSI residual valve is installed in line between the master cylinder and disc brake calipers to keep 2 PSI of residual pressure at the caliper after the brake pedal is released. This ensures that you will have a high, firm pedal next time you press the brake pedal. If your master cylinder is located below the floorboard, installing a 2 PSI residual valve is highly recommended. If your master cylinder is mounted on the fire wall, a residual valve is generally not needed because gravity will provide a natural residual pressure within the brake line.

Hold 10 lb of line pressure at all times- Keeps wheel cylinder cups expanded and ready to move

For use in brake line supplying drum brakes- Should be mounted as close to the master cylinder

45-24RAS axle seat only

pair \$21.95

Alignment Solution for Installing a Late Model Rear End in a 1947-1954 Pick U

On the original rear end, the spring centerbolt is offset to the front of the spring by 2" to 3". If you install a modern rear end (with an open driveshaft) and retain the original springs, the wheels will end up offset forward (inside) of the original wheel openings in the fenders. To correct this problem, remove the original springs and reverse them end to end (front to back) as they are the same on both ends. This will bring the spring centerbolt to the rear of the axle and place the new rear end in the center of the fender wheel openings.

1947-54 Chevy Pickup Truck 4-Link Suspension Kit, Complete

45-24LINK-----\$1895.00

1947-54 Chevy & GMC----- Lowers your truck 4-6"

- Truck and GMC Truck coil-over 4-link rear suspension provides the best ride for any Classic truck. These 4-link kits attach directly to the stock frame rails and the adjustable axle brackets let you set the height in one of three positions. A bolt-in upper coil-over crossmember is included. All brackets are made from 1018 mild steel. Our 4-link bars are double adjustable and made from DOM tubing. The double adjustable feature not only allows for precise rear end positioning, but allows you to adjust your pinion angle as well-plain steel items require welding

INCLUDES

- Upper Shock Crossmember (Black Powder Coated)
- Frame Brackets (Black Powder Coated)
- Axle Mount Brackets (Plain steel)
- Panhard Bar (Weld On, Zinc Coated Bar, Plain Brackets)
- 4 Bars Set (Zinc Coated)
- Coil-over Shocks (Aldan American)
- All hardware
